How to Run the AI Readiness Skills Mission in Your School

Provide AI Readiness Skills to your students & teachers. Make your school AI Ready! Save it from AI. Grow it with AI.

Awareness > **Audit** > **Action**

iMature.in   HUMANS WINNING AI

The survival and success of students in the AI-dominated future is NOT possible without AI Readiness Skills

The **AI Readiness Skills Mission** transforms your school by developing crucial skills in students and teachers. It prepares them for the opportunities and threats of an AI-dominated future, by focusing on **DCIM skills**, the **4Cs**, and **AI Tools**. In other words, the mission empowers you to ride the **'NEP+AI+Internet'** wave, not drown in it!

It's a Race for Your School to Win These...

Objectives of the Mission

The AI Readiness Skills Mission of your school is an **official** and **high-priority** program to achieve the following objectives:

1 **Equip all Students* with AI Readiness skills**

2 **Equip all Teachers with AI Readiness skills**

3 **Train all Teachers to excel in '5C' roles**#

* All students of grades 8 to 12.
 # 'Creator', 'Curator', 'Conductor (of flipped classes)', 'Coach', 'Counsellor'
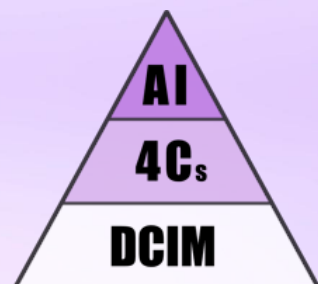

If you do not start focusing on AI Readiness of your school in 2025, your chances to save it from AI and grow it with AI will reduce with every passing year.

Bonus Benefits to Your School

If you really implement this mission on high-priority, magic can happen!

Your school gets aligned with NEP ☆

+

Your school's online reputation improves

Your digital marketing costs reduce to near zero
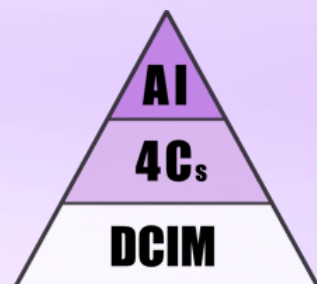

Your website's Google rank improves for free (SEO)

You get loads of content for your school magazine
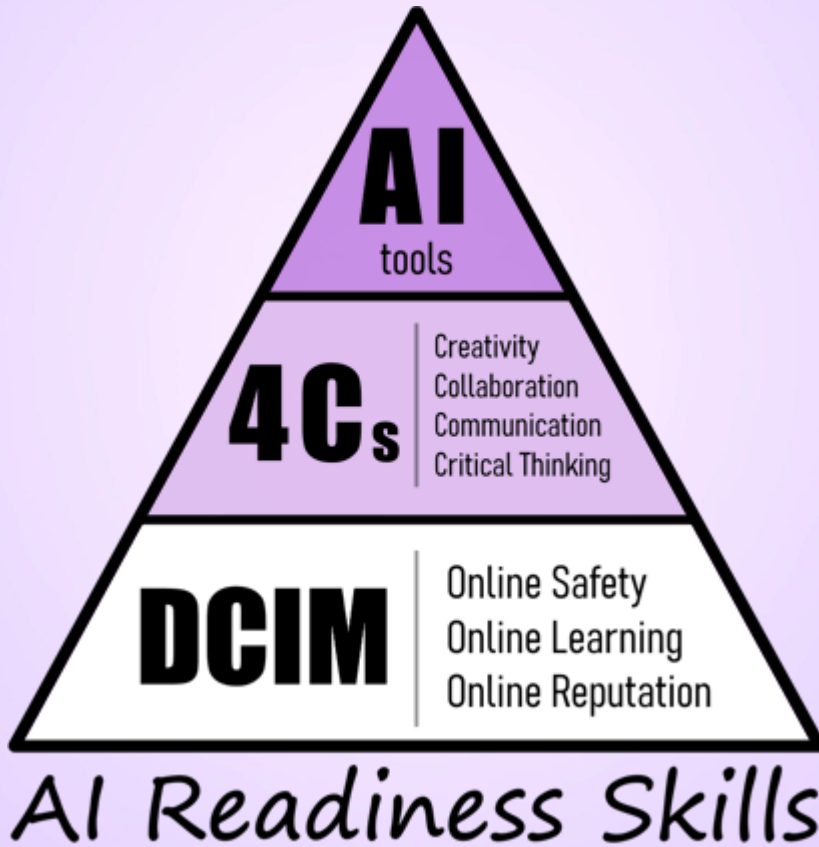

Digital discipline improves among students

Your school is protected from cyber-legal risks

Your students become better online learners

You earn lots of goodwill from the parents

DCIM

What are 'AI Readiness Skills' ?

AI Readiness Skills

- **AI tools**
- **4Cs** — Creativity, Collaboration, Communication, Critical Thinking
- **DCIM** — Online Safety, Online Learning, Online Reputation

These are a set of skills which empower your students and teachers to **survive** and **succeed** in an **AI-dominated** world. These skills help them to make the best use of the **opportunities** created by AI and stay safe from its **threats**. These skills are critical for students of grade 8 and above, from ALL streams (science, humanities & commerce).

All the above skills (the entire pyramid) are **compulsory** for becoming AI-Ready. Removing any of the skills will compromise the AI-Readiness of the student or the teacher. The skills are explained in detail on the website - **aireadinessskills.com**.

iMature.in   HUMANS WINNING AI
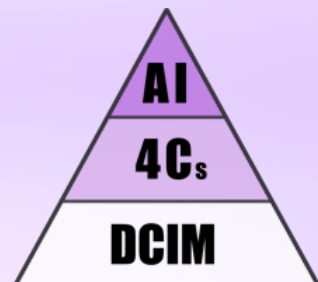

What 'AI Readiness Skills' are <u>NOT!</u>

The AI Readiness Skills are a combination of skills that result in long-term AI readiness for students and teachers. **AI Readiness Skills (and this mission) are...**

❌ **NOT just about learning AI tools:** We shall not be conducting classes/workshops to teach how to use AI tools.

❌ **NOT about using AI tools in classrooms:** We shall not be advising on which AI tools teachers can use in their classes.

❌ **NOT about teaching Python or robotics:** We shall not be conducting classes/workshops on Python, robotics, IoT or any hardware/software skills.

❌ **NOT a short certification program:** It's not a short-term program, it's a transformation program! Your survival & success will be the REAL certificate! However we shall be giving certificates and even trophies to schools! Check out the last section of this toolkit *"Certificate & Trophies"*.

❌ **NOT about adding the "AI" subject to the curriculum:** We shall not be teaching *"What is AI?"* as a subject. Instead, we shall obsess over skills to stay safe from AI and grow with it.

❌ **NOT limited to students only:** The AI Readiness skills are critical for teachers too.

❌ **NOT about creating new infrastructure or facilities:** Schools don't need to buy special hardware/software or build new labs etc to run the mission.

DCIM
Appointing the Mission Head

A **Mission Head** must be appointed to execute the mission's 3 steps. Select someone who can take responsibility for completing all 3 steps of the mission. This person must have:

- ✓ Good collaboration & coordination skills,
- ✓ Good clarity of how to promote school activities online, and
- ✓ Genuine motivation to build a 21st century school,

Progress Tracker Doc for the Principal

Mission head must provide this document to the Principal

Download this PDF (A3 size) and get it **printed** for the Principal to track the mission's progress.

Warm-up for the Principal & the Teachers

The Principal and the teachers (including the Mission Head) must try to answer the **20 questions** of the **'Toughest Exam for Indian Schools'** and watch the answer videos. Provide the following PDF to everyone:

The Toughest Exam for Indian Schools!

Date: May 2024	Subject:	Marks:
Time: 1 year	**NEP, AI, & the Internet**	100

- *This exam should be taken by* **School Leaders** *(Principals, Vice-Principals, Senior Teachers, Directors, Chairpersons etc).*
- *This question paper contains 20 questions of 5 marks each. All the questions are compulsory.*
- *You're* **allowed** *(rather* **encouraged***) to refer* **any book, website, AI, or human expert.** *Link to 'Answer Key Videos' is given on the last page.*
- *You may record your answers in any format - text, audio, or video.*
- *To get your answers assessed, go to* https://imature.in/schools *and fill the request form, or approach a 21st century education expert.*
- *Minimum* **survival** *marks are 50.*

Q.1. Your school is expected to create a **multidisciplinary** learning system for students, which might require your teachers to collaborate with **outside experts**, & **professionals** from different fields, to teach a topic. What system will you develop in your school to do this on a regular basis, for every subject?

Q.2. How will you make the teaching-learning more **enjoyable** and **participative** for your students? Using animated or interesting lesson videos in the class is a popular idea. Please suggest more ideas.

Q.3. NEP wants you to **prepare** your students for a successful **21st century career**. As you know, 'preparing students' takes much more effort than just 'making them aware'. What system will you create in your school to achieve this objective?

Q.4. NEP says, one of the most important outcomes of school education for a child must be the development of **'Higher Order Thinking Skills'**, which includes the well-known '4 Cs' of 21st century education – **creativity, communication, collaboration** and **critical thinking**. What

STEP - 2

Awareness **Audit** Action

Conduct the AI Readiness Skills Audit
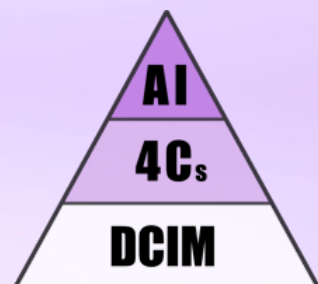

AI
4Cs
DCIM

iMature.in   HUMANS WINNING AI
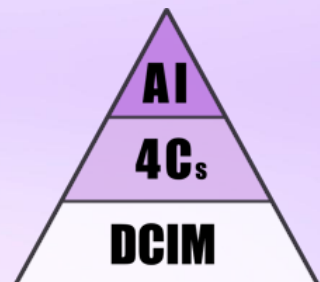

In this step we shall check what is your current level of AI Readiness. This step includes:

2.1 - School's AI Readiness Audit

2.2 - Teachers' AI Readiness Audit

2.3 - Students' Skills Gap Assessment
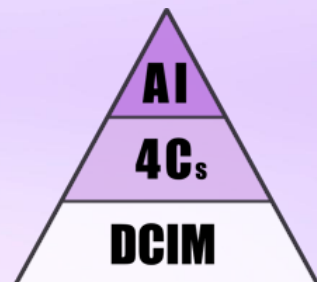

2.4 - Parents' Readiness Audit

AI
4Cs
DCIM

2.1 - School's AI Readiness Audit

Schools' AI Readiness Audit is for the Principal or decision makers to assess the AI Readiness of your school. For this, the principal must answer the questions given in the audit below.

Mission head must follow the steps given below to conduct the Schools' AI Readiness Audit:

1. Download and take print of the Audit PDF given below.
2. Give the printout to the Principal and request to answer the questions.
3. After the Principal answers the audit questions, you must do the assessment of the audit. For assessment WhatsApp us on **+91 8103930394** to get the answer keys.
4. After the assessment, share the audit results with the Principal.

iMature.in   HUMANS WINNING AI
2.2 - Teachers' AI Readiness Audit

Teachers' AI Readiness Audit is for teachers to assess their level of 5C roles and AI Readiness Skills. For this, teachers must answer the questions given in the audit below.

Mission head must follow the steps given below to conduct this audit:

1. Download and print the audit PDF given below.
2. Give the printout to all the teachers and request them to answer the questions given in the audit. Ask teachers to submit it to you within two days.
3. Now, you must do the assessment of all the teachers. For this send your request on WhatsApp **+91 8103930394** to get the answer keys.
4. After the assessment, share the audit results with the Principal.

Download

iMature.in HUMANS WINNING AI
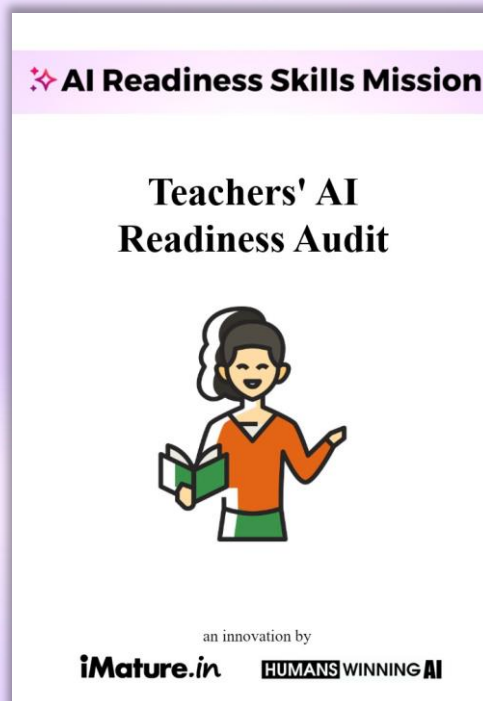

2.3 - Students' Skills Gap Assessment

'Students' Skills Gap Assessment' is for students (class 8th to 12th) to assess their Digital Citizenship & Internet Maturity (DCIM) Skills gap. For this, students must answer the questions given in the audit below.

Mission head must follow the steps given below to conduct the students' skills gap assessment:

1. Download and print the audit PDF given below and give it to all the students of class 8th to 12th.
2. Give 30 minutes to students in the classroom to answer the audit questions and then collect it from the students.
3. Now, you must do the assessment of all the students. For this send your request on WhatsApp **+91 8103930394** to get the answer keys.
4. After the assessment, share the results with the Principal.
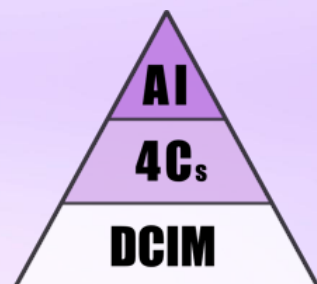

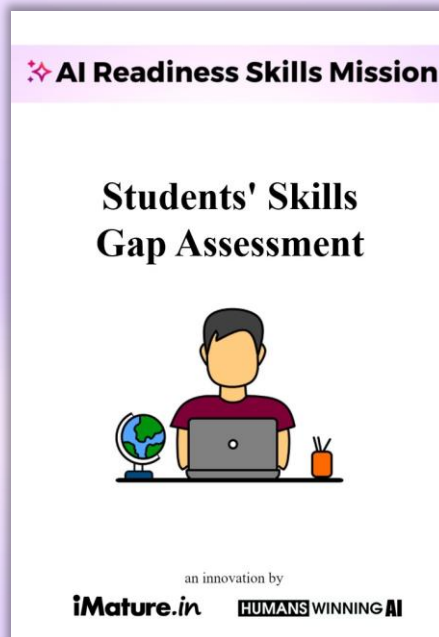

2.4 - Parents' Readiness Audit

'Parents Readiness Audit' is for parents of students of class 8th to 12th to assess their sensitivity towards AI Readiness Skills and their willingness to support AI Readiness Skills Mission.

Mission head must follow the steps given below to conduct the audit:

1. Download the audit PDF given below, it contains the questions for parents. Convert the pdf into a google form to share it with the parents.
2. Share this link of the google form with parents on Whatsapp and ask them to answer the questions given and submit it within 2 - 3 days.
3. After all the parents submits the form, do the parents assessment. For assessment send your request on WhatsApp **+91 8103930394** to get the answer keys.
4. After the assessment, share the results with the Principal.

Teach AI Readiness Skills to Students & Teachers

AI
4Cs
DCIM

In this step we shall implement the following programs to teach AI Readiness Skills to students & teachers:

3.1 - Starting the DCIM Subject

3.2 - Teachers' Training

3.3 - Starting the DCIM Club

3.4 - Starting the AI Readiness Incubator

AI
4Cs
DCIM

Why to teach DCIM as a subject?

**Digital Citizenship & Internet Maturity** skills are the foundation for the **AI Readiness** of your students & teachers, and the **NEP+AI+Internet Readiness** of your school. We say DCIM is the **'Most Important Subject'** for a 21st century school!

"21st Century School"?
"NEP+AI+Internet Ready School"?
What does that mean?
What happens in such a school?
Can any school leader afford NOT to have clarity on that? Did you do the warm-up exercise suggested earlier? If not, please do it now! **Try to answer** the 20 questions of the *'Toughest Exam for Indian Schools'*. Then **watch this video playlist** on Youtube to understand what is "NEP+AI+Internet Readiness" and how the DCIM subject plays a critical role in the future of your school.

The Toughest Exam for Indian Schools!

Date: May 2024	Subject: **NEP, AI, & the Internet**	Marks: 100
Time: 1 year		

- This exam should be taken by **School Leaders** (Principals, Vice-Principals, Senior Teachers, Directors, Chairpersons etc).
- This question paper contains 20 questions of 5 marks each. All the questions are compulsory.
- You're **allowed** (rather **encouraged**) to refer **any book, website, AI, or human expert.** Link to 'Answer Key Videos' is given on the last page.
- You may record your answers in any format - text, audio, or video.
- To get your answers assessed, go to https://imature.in/schools and fill the request form, or approach a 21st century education expert.
- Minimum **survival marks** are 50.

Q.1. Your school is expected to create a **multidisciplinary** learning system for students, which might require your teachers to collaborate with **outside experts**, & **professionals** from different fields, to teach a topic. What system will you develop in your school to do this on a regular basis, for every subject?

Q.2. How will you make the teaching-learning more **enjoyable** and **participative** for your students? Using animated or interesting lesson videos in the class is a popular idea. Please suggest more ideas.

Q.3. NEP wants you to **prepare** your students for a successful **21st century career**. As you know, 'preparing students' takes much more effort than just 'making them aware'. What system will you create in your school to achieve this objective?

Q.4. NEP says, one of the most important outcomes of school education for a child must be the development of **'Higher Order Thinking Skills'**, which includes the well-known '4 Cs' of 21st century education – **creativity, communication, collaboration** and **critical thinking**. What

Promote Teachers' Training Activity on Social Media

See the following example:

📢 **Empowering Our Teachers with AI Readiness Skills!** 🤖 ✨

Our school has launched the #AIReadinessSkillsMission. Our teachers underwent intensive training on becoming AI Ready Educators. The training session focused on AI Readiness Skills and 5Cs role which a teacher must play. Following were covered in the session:

✅ **Understanding AI's Capabilities: Exploring how AI is transforming education and the importance of embracing new roles.**
✅ **Embracing the 5 Cs: Developing skills as Content Creators, Curators, Coaches, Counselors, and Conductors to enhance student engagement.**
✅ **Building AI Readiness Skills: Focusing on Digital Citizenship and Internet Maturity (DCIM), the 4 Cs (Critical Thinking, Creativity, Collaboration, Communication), and use of AI tool.**

By equipping our teachers with these competencies, we aim to create a dynamic learning environment where teachers and AI collaborate to enrich student experiences.

3.3 - Starting the DCIM Club

The **Digital Citizenship & Internet Maturity Club** is a team of students & teachers, officially recognized by the school administration.

When you teach DCIM as a subject in your school, it ensures that **your students** build a strong foundation for their AI Readiness. When you start the DCIM Club, **your school** derives these bonus benefits from the Internet maturity of your students & teachers:

- Your school gets aligned with NEP
- Your school's online reputation improves
- Your digital marketing costs reduce to near zero
- Your website's Google rank improves for free (SEO)
- You get loads of content for your school magazine
- Digital discipline improves among students
- Your school is protected from cyber-legal risks
- Your students become better online learners
- You earn lots of goodwill from the parents

3.4 - Starting the AI Readiness Incubator

The AI Readiness Incubator is an initiative/program which your school should start for students to PRACTICE & APPLY their AI Readiness Skills. It would be an internal program of your school to facilitate and encourage your students to pursue advanced and/or entrepreneurial projects, which are based on solving real-world problems or filling a market gap - **with mandatory use of AI!** Such projects usually span more than 2–3 months. Students involved in this program are sure to develop advanced problem-solving skills and in-depth clarity on AI implementation *(that's exactly what they need for a successful 21st century career!)*.

How to Run the AI Readiness Incubator?

1. Select High-Impact Projects: Challenge students to propose projects which solve real-world problems. They can take inspiration from globalgoals.org.

2. Make the use of AI COMPULSORY! Explain to students that whatever project they are doing, they must use AI tools in the project wherever possible.

3. Engage Industry Mentors: Partner with local companies, startups, or alumni who can guide the students.

4. Foster Entrepreneurship: Encourage students to make their projects "Market Ready Products/Services".
